## EDUCATION

### Jain University

Bengaluru, Karnataka, India

*B.Tech in Computer Science and Engineering (CGPA: 7.9/10)*

2020 – 2024

- Studying specialization in Cloud Technology and Mobile Application.
- I volunteer on campus as a class representative and a member of the campus coding presentation team for juniors (elementary school students).

## WORK EXPERIENCE

### Empowering Next Generation

Addis Ababa, Ethiopia

*Founder and Frontend Development Engineer*

Dec. 2018 – March 2022

- Leading day-to-day activity, meeting with responsible stakeholders from high-level government officials to potential funding partners, organizing training and different events, and overseeing the organization.
- I have developed leadership and communication skills. In the last three years, we've reached several milestones and raised over \$100,000 from international and local partners.
- In order to facilitate growth for the organization, I chose WordPress, and our website is appealing, informative, and easy to navigate for our partners, investors, and stakeholders. I am also able to display job openings on the website to recruit new employees and volunteers.

### Intech Company

Bengaluru, Karnataka, India (Remote)

*Software Engineer (Web Development)*

June 2015 – Dec. 2021

- I have been doing front-end development for 5+ years, building and maintaining responsive websites in the recruiting industry. Proficient in HTML, CSS, Bootstrap, jQuery, JavaScript, Reactjs, and JSON; plus modern libraries and frameworks.
- I possess working knowledge of Figma design, Git, and Github.

## LEADERSHIP EXPERIENCE

### Hult Prize Foundation

Bengaluru, Karnataka, India (Remote)

*Campus Director and Regional Organizing Committee*

July 2022 – Present

- Lead the organization of the Hult Prize Foundation, a campus program at Jain University.
- Volunteering at Regional Summit with the world's biggest impact movement staff.

### U.S Embassy in Ethiopia (Jimma American Corner)

Bengaluru, Karnataka, India (Remote)

*Training Instructor Lead, Full Stack Web Development*

Aug 2021 – March 2022

- I have been leading and teaching full stack web development since the summer of 2021, to 30 participants in the US Embassy's American Space voluntarism program.

## SKILLS & INTERESTS

**Skills:** Language: C, Java, HTML5, & CSS3. Scripting: Javascript, and ES6/7. Server Scripting: Node.js (Express).

Database: SQL, MongoDB. Libraries: React. Framework/Responsive Design: Bootstrap, Flexbox, and Gridbox.

Operating Systems: macOS, Windows, and Linux (Ubuntu). Others: Data Structure and Algorithm, RESTful, GCP, Git & GitHub.

**Award:** 30 Days of Google Cloud Program (2021), Study In India Scholarship Recipient (2020), Top 200 African Innovators (2019), The idea to Product, Business Model canvas, and validation. by Techstars Startup Weekend in Association with Google (2019), Solve IT Innovation competition Bootcamp top 30 winners (2018).

**Interests:** I love learning new things, especially about spoken and programming languages. When I am not going to class I am learning about web design, teaching, writing, and playing tennis.
